CARBONADO

FILLING

CARBONADO FILLING COMPOSITE

Universal Nano Composite

Polishable to a High Degree

High Filler Rate

Light Reflection Property

CARBONADO FILLING

NIVERSAL NANO COMPOSITE

USuitable for various restorative applications due to its universal shade compatibility

LIGHT REFLECTION PROPERTY

The nano fillers mimic the natural tooth structure, providing a life-like aesthetic.

HIGH FILLER RATE

Ensures strength and durability for long-lasting restorations.

POLISHABLE TO A HIGH DEGREE

Can be polished to achieve a high gloss finish, enhancing the natural appearance of the restoration.

CARBONADO FILLING COMPOSITE

Shade Options:
A1, A2, A3, A3.5, B1, B2,

Carbonado filling Composite is a radiopaque, cost-effective nano hybrid composite system that can be applied in both anterior and posterior areas. This versatile composite combines advanced nano filler technology with superior handling properties, ensuring excellent aesthetics and high durability. Ideal for dental restorations, it offers a natural appearance and high resistance to abrasion.

CARBONADO

BONDING

CARBONADO BOND 5TH GEN

HIGH BOND STRENGTH

Ensures a strong and durable bond between the restorative material and the tooth structure

PERFECT ADHESION TO DENTIN AND ENAMEL

Provides excellent adhesion, ensuring the longevity and stability of the restoration

5TH GENERATION

Utilizes advanced adhesive technology to deliver reliable and consistent results.

SIZE

5ml

CARBONADO SBOND 7TH GEN

MDP MONOMER

Ensures strong and durable bonding to both enamel and dentin

LONG-LASTING RESTORATIONS

Provides reliable and durable restorations that withstand the test of time

TIME-SAVING

Efficient application process saves valuable time for dental professionals

NO EXTRA ETCHING REQUIRED

Simplifies the bonding process by eliminating the need for additional etching steps

7TH GENERATION TECHNOLOGY

Utilizes advanced adhesive technology to deliver optimal performance and consistent results

SIZE

5ml

CARBONADO ADHESIVE SYSTEM

5 ml

Carbonado Adhesive System is a light-curing, single-component, 5th generation bonding agent designed for adhesive restorations. This universal adhesive system is compatible with all composites, making it a versatile and essential addition to any dental practice.

Carbonado Self Etching Adhesive System is a 7th generation self-etching, light-curing, onecomponent adhesive designed for adhesive restorations. This advanced adhesive system eliminates the need for extra etching with phosphoric acid, streamlining the bonding process and saving valuable time during dental procedures.

CARBONADO

ORTHO

CARBONADO ORTHODONTIC ADHESIVE

designed specifically for bonding of orthodontic brackets

Easy Handling

High Bonding Strength

Color Stability

Light Curing

CARBONADO ORTHO ADHESIVE

EASY HANDLING

Formulated for smooth and convenient application

COLOR STABILITY

Maintains a consistent and aesthetic appearance over time

HIGH BONDING STRENGTH

Ensures robust adhesion, reducing th likelihood of bracket failures

LIGHT CURING

Allows for precise and controlled curing, enhancing application efficiency.

CARBONADO ORTHODONTIC ADHESIVE

3,5g

Carbonado Orthodontic Adhesive RubyDent Orthodontic Adhesive is a high-performance lightcuring adhesive designed specifically for bonding of orthodontic brackets. Its superior bond strength minimizes bracket failures, while the bonding primer containing MDP monomer supports both physical and chemical adhesion, ensuring reliable and longlasting results.

CARBONADO

FLOW

CARBONADO FLOWABLE COMPOSITE

CARBONADO FLOW is flowable light curing radiopaque composite.

Low Shrinkage, Low Wear

Beatiful esthetic restoratio ns

Non sticky

Very good marginal adaptation

High gloss polishibility

Very low surface roughness

Excellent handling

CARBONADO FLOWABLE COMPOSITE

LOW SHRINKAGE, LOW WEAR

Minimizes polymerization shrinkage and ensures long-lasting restorations

HIGH GLOSS POLISHABILITY

Can be polished to a high gloss, enhancing the aesthetic appearance of restorations

VERY GOOD MARGINAL ADAPTATION

Ensures tight and secure margins, reducing the risk of leakage and secondary caries

SIZE

2gr

CARBONADO FLOWABLE COMPOSITE

3.5GR

Carbonado Flowable Composite is a light-curing, radiopaque composite designed for various dental restorations. Its flowable consistency ensures excellent handling and adaptability, making it ideal for small cavities, lining, and repairs. This versatile composite combines aesthetic appeal with superior mechanical properties to deliver exceptional results.

CARBONADO

ETCH

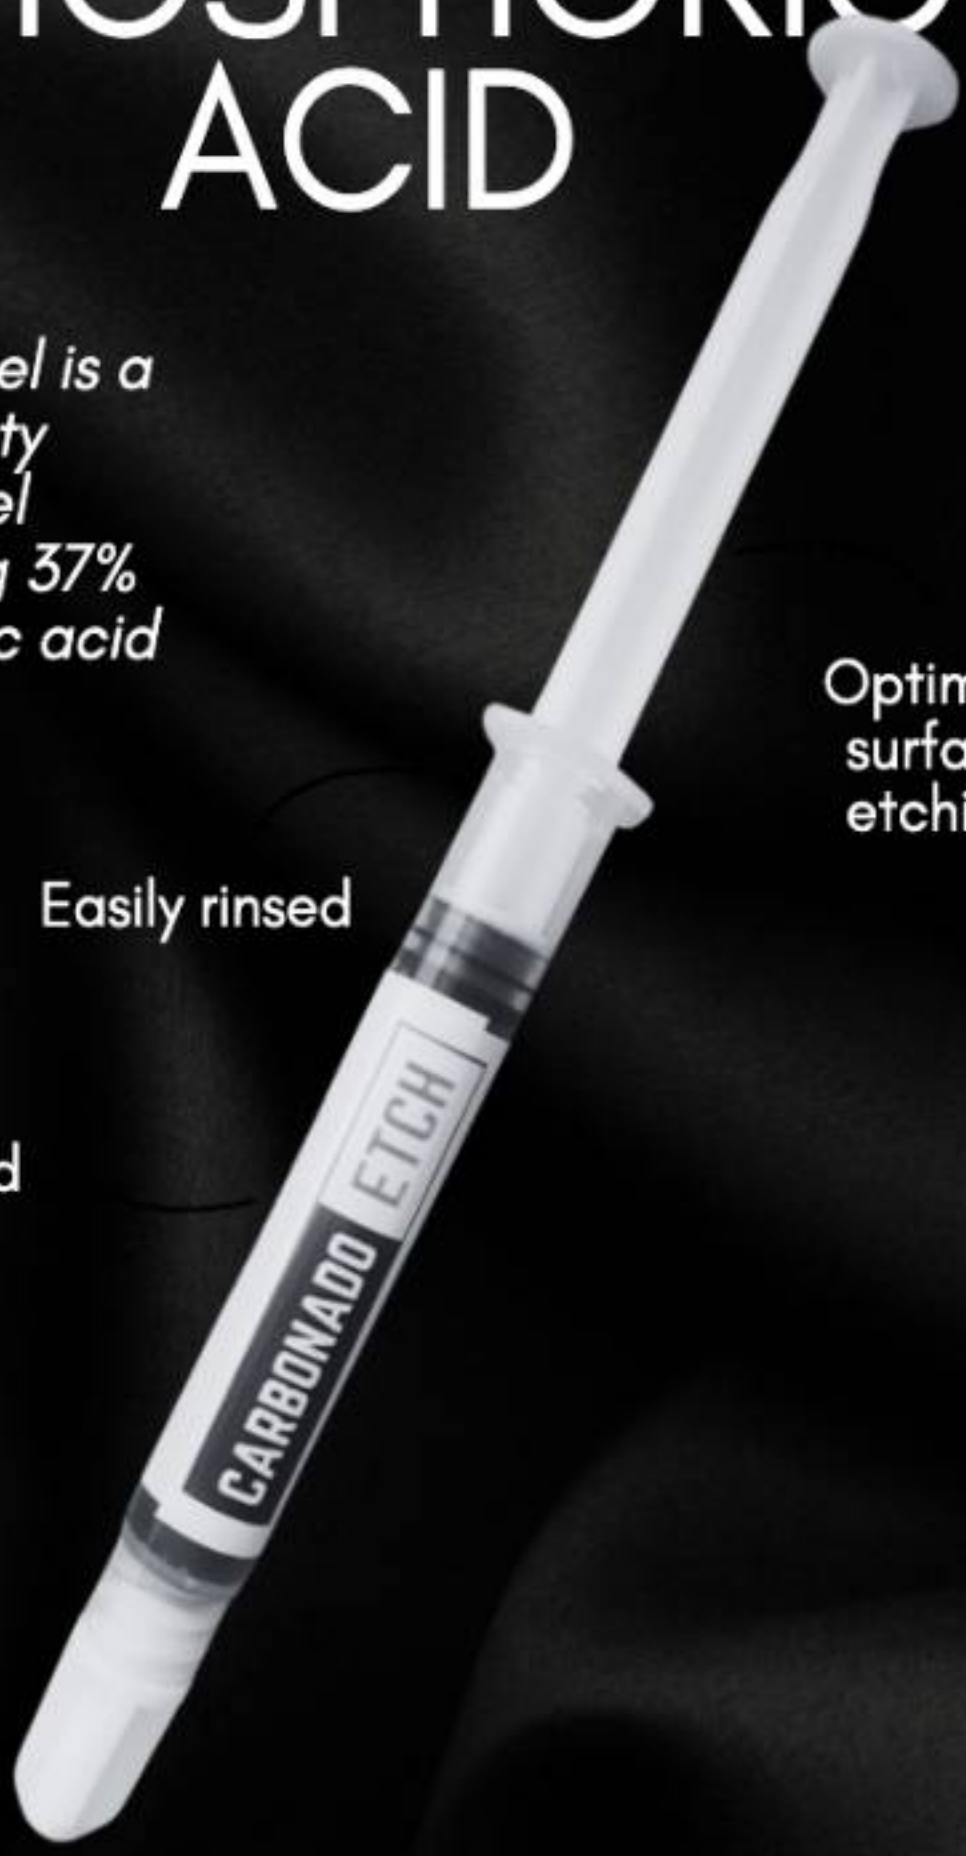
CARBONADO ETCHING GEL 37% PHOSPHORIC ACID

Etching Gel is a high-quality etching gel containing 37% phosphoric acid

Optimum surface etching

Easily rinsed

Blue coloured



CARBONADO ETCHING GEL

EASILY RINSED

The gel is easily rinsed away, leaving no residue and ensuring a clean surface for subsequent procedures

OPTIMUM SURFACE ETCHING

Provides effective and consistent surface etching, enhancing the bond strength between the tooth surface and restorative materials

BLUE COLORED

The distinct blue color allows for easy identification and precise application, ensuring thorough etching of the desired areas

SIZE

3ml Syringe

CARBONADO ETCHING GEL 37% PHOSPHORIC ACID

3ML

CARBONADO Etching Gel is a high-quality etching gel containing 37% phosphoric acid, designed for optimal surface etching in dental procedures. The gel's formulation ensures excellent handling and precision, making it an essential tool for dental professionals. The blue-colored gel ensuring accurate and effective etching.

Your complete kit, Everything in it!

CARBONADO MAX COMPOSITE KIT

CARBONADO MAX FILLING CMOPOSITE KIT

3 ETCHANTS

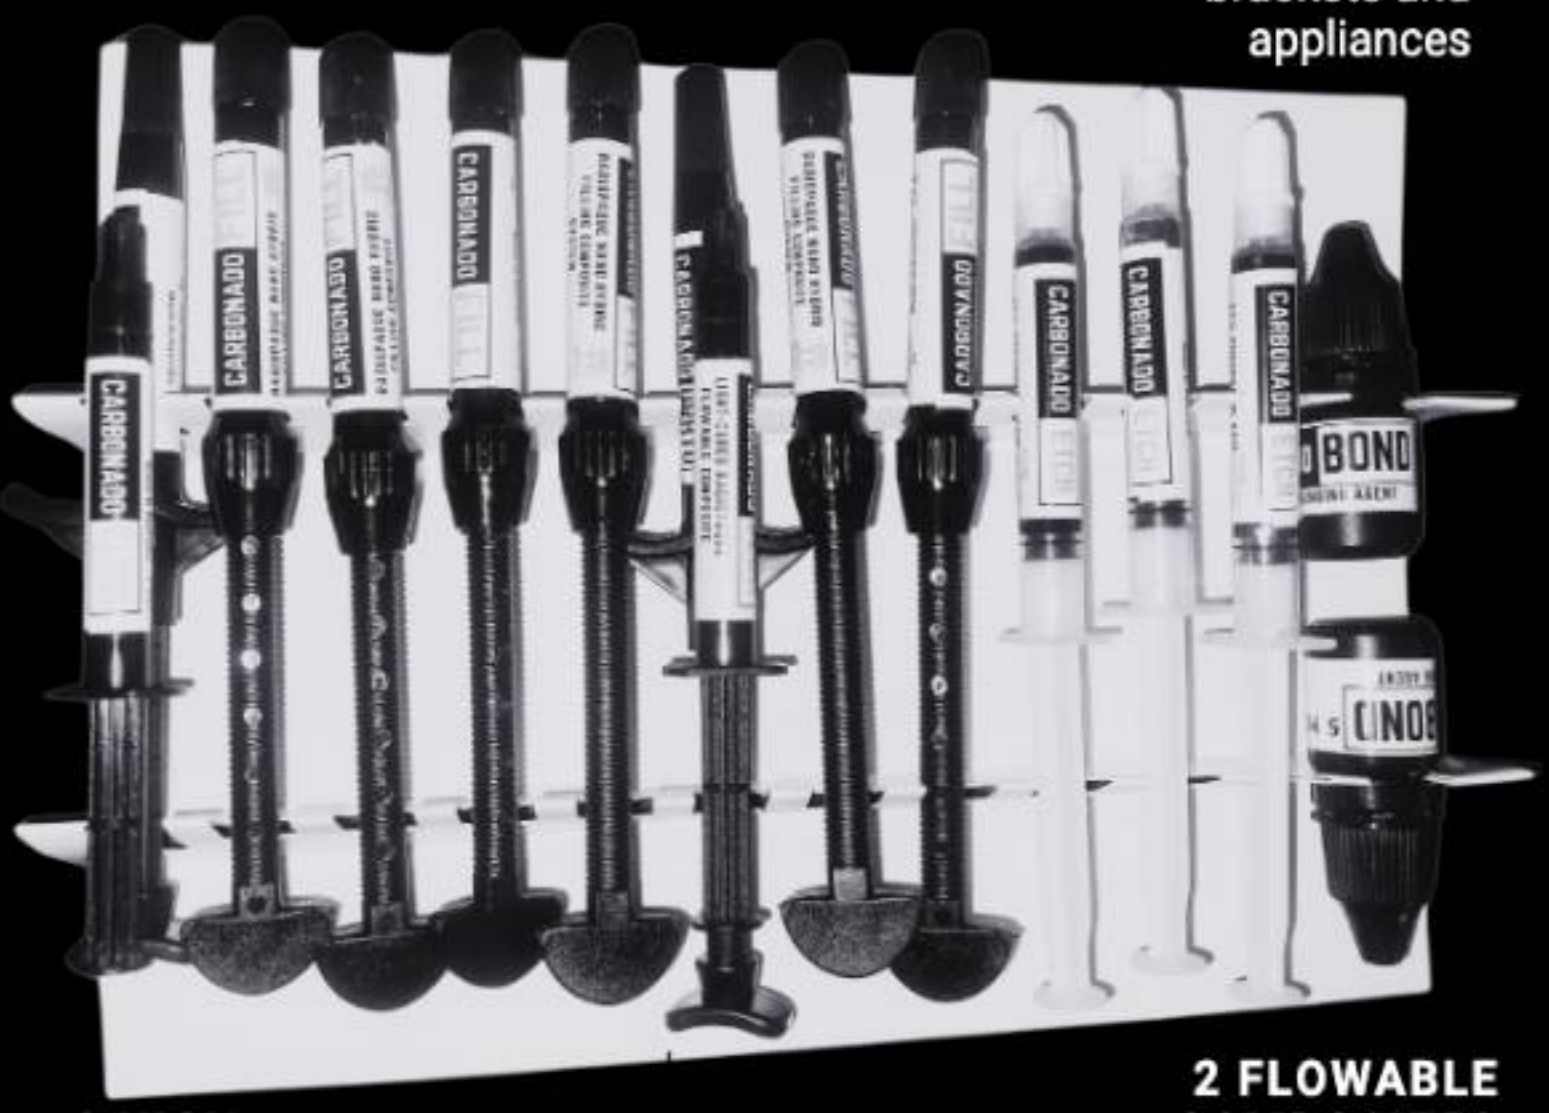
Precisely formulated for effective enamel and dentin etching

6 NANO HYBRID COMPOSITE SHADES

Shades – A1 – A2 – A3 – A3,5 – B1 – B2

2 ORTHODONTIC COMPOSITES

providing excellent bond strength for brackets and appliances



2 HIGH-PERFORMANCE BONDING AGENTS

long-lasting bond strength to both enamel and dentin

2 FLOWABLE COMPOSITES

Perfect for liner, base, and small cavity fillings

COMPLETE ACCESSORY PACK

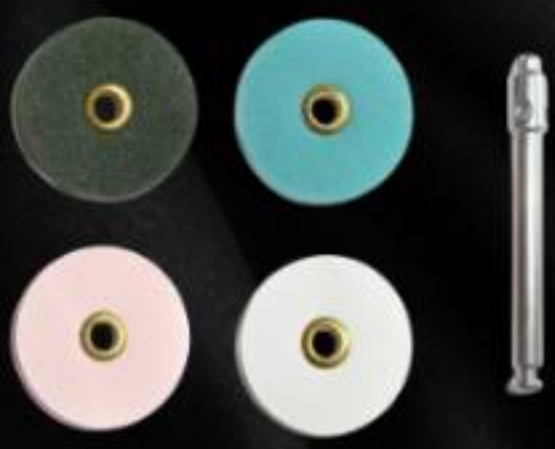
Includes, Cannula Tips, Wooden Wedges, Micro Applicators, Polishing Discs, and Mixing Wells.

CARBONADO MAX FILLING CMOPOSITE KIT

Complete Accessory Pack

Cannula Tips: For precise and controlled etchant application.

1



2

Polishing Discs: To achieve a high-gloss, natural-looking finish on your restorations.

Wooden Wedges: Essential for matrix stabilization and proximal contact.

3

4

Mixing Wells: Convenient for preparing and handling materials.

Micro Applicators: For controlled placement of bonding agents and other liquids.

5

CARBONADO MAX FILLING COMPOSITE KIT

Your complete kit Everything in it!

This comprehensive kit is meticulously designed to empower dental professionals with everything needed for superior direct restorations, from routine fillings to advanced orthodontic applications. At its core, our nano hybrid composite leverages advanced technology to deliver an optimal balance of strength, polishability, and natural aesthetics. You'll achieve durable, long-lasting restorations that blend seamlessly with natural dentition.

CONFIDENT

WHITE

CONFIDENT WHITE OFFICE TOOTH WHITENING SYSTEM

this system ensures effective and rapid whitening results

35% Hydrogen Peroxide

Low Sensitivity

Single Applicati on

Syringe Coupling System

CONFIDENT WHITE OFFICE

35% HYDROGEN PEROXIDE

Ensures powerful and effective whitening results

SYRINGE COUPLING SYSTEM

Provides easy and precise application

SINGLE APPLICATION

Delivers results with just one application per session

LOW SENSITIVITY

Formulated to minimize discomfort and sensitivity during and after treatment.

EXCELLENT VISCOSITY

Ensures the gel stays in place for optimal performance

EASY APPLICATION

Designed for smooth and efficient use in a dental office setting

CONFIDENT GINGIVA BARRIER

EASILY REMOVABLE AFTER TREATMENT

Ensures convenient removal post-procedure

BLUE SHADE

Enhances visibility and application accuracy

5 SECOND CURING

Allows for quick and efficient use.

MINIMIZES HEAT AND SOFT TISSUE SENSITIVITY DURING CURING

Provides comfort and safety for patients

CONFIDENT WHITE OFFICE

35% HP

CONFIDENT White Office is a professional tooth whitening system designed for use in dental offices. Utilizing a 35% hydrogen peroxide formula, this system ensures effective and rapid whitening results. It is specially formulated to provide patients with a brighter smile while minimizing sensitivity.

CONFIDENT Dam Gingiva Barrier is a light-curing resin-based barrier designed to protect soft tissue during dental procedures. This barrier ensures minimal heat and soft tissue sensitivity during curing, providing a comfortable experience for patients.
